- Ability to work accurately under pressure, adhering to deadlines and service standards
- A general understanding of building structures and materials including steel, masonry, concrete and timber
- MICE or MIStructE accredited desirable
- Several years' experience in structural surveys of buildings
- Several years' post graduate design experience

The role involves:

- To demonstrate a high level of technical quality and service delivery
- To provide exceptional customer service at all times
- To participate positively and constructively as a team member, sharing knowledge and providing feedback and suggestions
- To inspect all types of buildings and structures; and the preparation of digital reports, live on site
- To prepare specifications for remedial works
- To provide technical support; and design calculations, for buildings insurance claims, including subsidence, fire, impact, and storm damage
- To complete site visits for residential and commercial building projects, using digital technology
- To deliver small to medium design projects
- To report to the Managing Director and provide progress reports
- To develop new ideas to help shape the future of the business
- To promote and support the TCF principles
- To ensure adherence to contractual/Client SLA's and KPI's

The Package:

- Competitive salary
- Enhanced contributory pension
- Performance related bonus
- Flexible benefits
- Enhanced family leave
- Electric car scheme
- Voluntary benefits schemes
- Birthday holiday
- Share purchase scheme with interest free loans

Hours of work:

Standard working week is 37.5 hours, Monday to Friday with flexibility to work from home /office.

Closing Date for Applications:

Close of business on Friday 15th December 2023.
